EDUCATION

National Taiwan University 2018/09 - present
Ph.D. , Computer Science and Information Engineering (CSIE) (expected Aug. 2024)
Advisor: Yun-Nung (Vivian) Chen

National Taiwan University 2014/09 - 2018/06
B. S., Computer Science and Information Engineering (CSIE) GPA: 3.96/4.3

RESEARCH INTERESTS

- Natural Language Processing (NLP)
- Dialogue Systems
- Machine Translation
- Open-domain Retrieval

WORKING EXPERIENCES

Meta

Research Scientist Intern, FAIR 2023/07 - 2023/11

Research on leveraging large language models to end-to-end speech translation. We examined architectural designs and fine-tuning techniques for improved speech-to-text translation.

Research Intern (AI) 2022/09 - 2023/01

Research on evaluating and improving translation accuracy of named entities. We found that nearest neighbor methods improve named entity translation quality.

Amazon

Applied Science Intern, AlexaAI 2021/07 - 2021/10

Research on transfer learning of dialogue state tracking with locale differences and ASR robustness.

Applied Science Intern, AlexaAI 2020/03 - 2020/06

Organization of DSTC9 track 1, focusing on knowledge selection and knowledge-grounded response generation in dialogue systems.

Taiwan AI Labs 2017/07 - 2019/12

Software Engineering Intern, Speech Recognition and Synthesis Group

Developing ASR system that serves as backbone of several products (e.g., Yating Transcriber, Yating Input Method, Yating Pianist). The ASR-assisted products have over a hundred thousand installations.

- Acoustic model data preparation, training and optimization.
- Language model data collection, training and optimization.

National Taiwan University

Teaching Assistant

CSIE5431 Applied Deep Learning (2019 Spring, 2020 Spring, 2021 Spring, 2022 Spring, 2023 Fall)

HONORS & AWARDS

1st Place, Formosa Grand Challenge - Talking to AI 2019/03

The Formosa Grand Challenge(FGC) is a challenge held by the Ministry of Science and Technology. The participants are required to develop a spoken question answering system that is capable of answering questions in spoken content. We won the 1st place overall among over 100 teams.

3rd Place, the 7th Dialogue System Technology Challenge 2018/11

The 7th Dialog System Technology Challenge (DSTC7) provides three challenges for end-to-end dialogue systems. We participated in track 1, dialogue response selection challenge, and ranked 3rd and 4th on two different datasets.

TECHNICAL SKILLS

Programming Languages

Python, C++

Deep Learning Frameworks

PyTorch, TensorFlow, Keras

LANGUAGES

Mandarin (native)

English (proficient)
